8. (Currently amended) A semiconductor device ~~characterized by~~ comprising:
a source electrode formed on a substrate~~[[,]]~~;
a source bus formed on said source electrode~~[[,]]~~; and
a drain electrode that is formed on said substrate and ~~comprises~~
includes a first electrode and a second electrode formed on said first electrode,
~~and further characterized in that wherein~~ an edge portion of said source
electrode protrudes toward said drain electrode relative to an edge portion of said
source bus and an edge portion of said first electrode of said drain electrode
protrudes toward said source electrode relative to said second electrode.

9. (Currently amended) ~~[[A]] The semiconductor device as claimed in of claim 8,~~
~~characterized in that wherein~~ each edge portion of said source electrode, said source
bus, said first electrode and said second electrode is formed into a surface ~~which~~
that is perpendicular to said substrate.

10. (Currently amended) ~~[[A]] The semiconductor device as claimed in of claim 8,~~
~~characterized in that wherein~~ each edge portion of said source electrode, said source
bus, said first electrode and said second electrode, ~~is~~ formed into a surface ~~which~~
that is inclined relative to said substrate.
